AT&T Wireless Internet

2.4GHz Wi-Fi Information

Main	Network Name (SSID): ATT-WI-7304 Security: WPA2-PSK Password: 41073154 Edit 2.4GHz Main Wi-Fi 0 user(s) connected - Block Users	Guest	Network Name (SSID): ATT-WI-7304-GUEST Security: WPA2-PSK Password: 06706333 Edit 2.4GHz Guest Wi-Fi Guest Wi-Fi is OFF
-------------	--	--------------	---

5GHz Wi-Fi Information

Main	Network Name (SSID): ATT-WI-7304 Security: WPA2-PSK Password: 41073154 Edit 5GHz Main Wi-Fi 0 user(s) connected - Block Users	Guest	Network Name (SSID): ATT-WI-7304-GUEST Security: WPA2-PSK Password: 06706333 Edit 5GHz Guest Wi-Fi Guest Wi-Fi is OFF
-------------	--	--------------	---

Restart Device

Power your device off and on

[Restart](#)

Go to Settings. And you will be here

The screenshot shows the AT&T mobile settings interface. At the top, there is a status bar with icons for power, Wi-Fi, signal strength, and battery, along with a 'Logout' button. On the left, a navigation menu includes 'Home', 'Connected Devices' (1 device), 'Data Usage', 'Call Log', 'Messages' (0 unread / 0 total), 'Parental Controls', 'Settings' (highlighted in orange), 'One-key Diagnostic', and 'About Your Device'. The main content area is titled 'Settings' and has tabs for 'Wi-Fi', 'Network', 'Firewall', and 'Advanced'. Under the 'Wi-Fi' tab, there are sub-sections for 'Basic', 'Security', and 'WPS'. The 'Wireless Networks' section is expanded to show '2.4GHz Main SSID' settings. These settings include: Network Mode (802.11 b/g/n), Network Name (SSID) (ATT-WI-7304), Broadcast Network Name (SSID) (radio buttons for Enable and Disable, with 'Enable' selected), and Frequency (Channel) (Automatic). An 'Apply' button is located at the bottom right of the settings area.

Then to Network and you should be here

Add

Delete

The correct APN for AT&T Users is **broadband** And For T-mobile Users is **b2b.static**. So As you can see it is ATT Nextgenphone and that is incorrect. So to correct it got to **Add** and you will see this

The screenshot shows the 'APN Settings' page with the following fields:

- Profile Selection: ATT Nextgenphone
- Profile Name *: (empty text box)
- APN *: (empty text box)
- DNS Mode: Auto DNS Manual DNS

The NCH Software logo is visible in the bottom right corner.

In the Profile Name * type For ATT users “**broadband**” And for the APN* “**Broadband**” and then click Set Default you should see this

The screenshot shows the 'APN Settings' page with the following fields:

- Profile Selection: broadband
- Profile Name *: broadband
- APN *: broadband
- DNS Mode: Auto DNS Manual DNS

The NCH Software logo is visible in the bottom right corner.

Now click on Connections Tab and you will be here
